

Orenco Composites Bridges

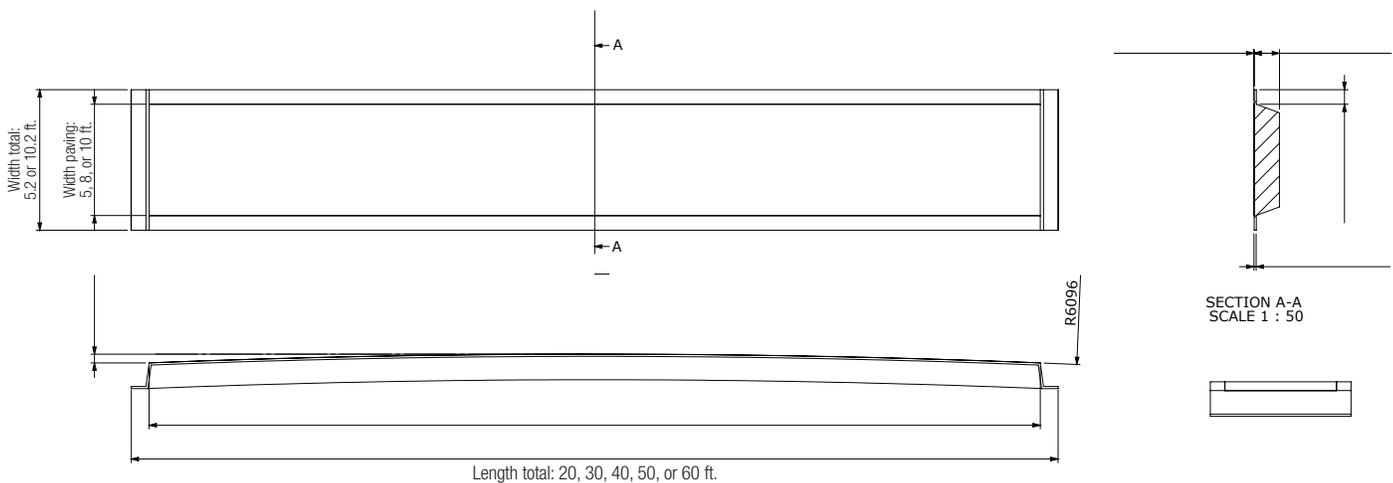

Benefits of Composite Bridges

Considering all the benefits of Orenco Composites bridges – award-winning patented InfraCore® technology, speed of installation, lightweight material, durability, and ease of maintenance – they offer lower life-cycle costs than traditional bridges. Our golf bridges are lighter than concrete, which means lower transportation costs and easier installation. And, because our bridges are resistant to the effects of moisture, rot, and extreme temperatures, they're virtually maintenance-free. With their long material life and low CO₂ emissions, Orenco Composites golf bridges are also the best choice for the environment.

Features

- Prefabricated
- Resistant to fatigue
- Resistant to impacts
- Strong and safe
- Transportable
- Lightweight
- Maintenance free
- Simple to install
- Anti-slip surface
- Fire resistant
- UV resistant
- Variety of color options

Classic Golf Bridge				
Length, ft. (m)	Width, ft. (m)	Span	Height, in. (cm)	Weight, lb. (kg)
20 (6.1)	5 (1.6)	Single	5.5 (14)	1100 (500)
30 (9.2)	5 (1.6)	Single	9.4 (24)	2000 (900)
40 (12.25)	5 (1.6)	Single	13.8 (35)	3200 (1450)
20 (6.1)	8 (2.45)	Single	5.5 (14)	2000 (910)
30 (9.2)	8 (2.45)	Single	9.4 (24)	3600 (1650)
40 (12.25)	8 (2.45)	Single	13.8 (35)	5800 (2600)
50 (15.35)	10 (3.05)	Single	17.7 (45)	9200 (4200)
60 (18.35)	10 (3.05)	Single	23.2 (59)	12,300 (5500)

Construction length, width, height, and weight are approximate figures. Weight includes non-skid surface.
